

RECOVERY INFORMATION FOR BUSINESSES & COMMUNITIES

This web page will provide information to businesses and communities to ensure that our clients and partners are informed of the opportunities available for federal funding. We are actively researching and communicating opportunities to make sure that we share relevant information with our target community.

The MEDC is prepared to help businesses and communities take advantage of the opportunities afforded by the Recovery Act. We are working to foster relationships with federal agencies and other state departments to ensure that Michigan's economic development needs are represented, and to assure fair treatment of the MEDC and Michigan under ARRA and other federal programs.
